

# **UPDATE TO THE COMMUNITY AUGUST 2016**

## **SAFETY IS KEY AS JOB POWERS UP**

TransAlta's powerline project is in full swing and safety is key for everyone. Meanwhile, members keep working, rig mats are down protecting the land and the new playground at 108 will soon be filled with laughing kids. See inside for all the details!

## UPDATE TO THE COMMUNITY AUGUST 2016

**SAFETY IS EVERYONE'S RESPONSIBILITY AS MAJOR CONSTRUCTION BEGINS. MEMBERS KEEP ON WORKING AND FUNDS FROM TRANSALTA AND ALTALINK WILL HELP PUT SMILES ON LITTLE FACES AT 108.**

### Preparations Complete, Construction Gears Up

TransAlta and ECN and as many as 30 community members have been hard at work since late June getting ready for major construction. Thousands of rig mats have been washed and are in place and ready to protect our land from the construction above.

ECN WORKER WASHES MATS AT WASHING STATION

### SAFETY FIRST!

- We must all take responsibility for safety.
- Please stay away from all construction zones and equipment.
- Please stay off the right of way area at all times.
- Please do not approach the crews while they are working.
- The work will be done safely but we need you to do your part too.
- If you have any concerns about the work or want to talk to someone about the project , please contact ECN's Project Liason, Kelly Morin at (780) 913-0980

With Phase 1 complete, the community will see work on the second and third phases as follows:

- Phase 2 (mid August to late September) is the construction phase and it will involve foundation installation, tower setting and wire stringing.
- Phase 3 (late September to early November) is the cleanup phase. Rig mats will be removed and the land will be remediated to the satisfaction of ECN staff.

You will see lots of activity in and around the reserve including the use of large equipment which must stay on the rig mats that have been put down. Operators are expected to conduct themselves safely and with respect for our community. Please do your part and do not approach the work or workers.

MATS BEING PLACED ON THE LAND

## **New Community Playground at 108 Coming Soon**

Good news for families in the 108 Block comes in the form of a new community playground built using funds secured from TransAlta and AltaLink.

Chief and Council believe that our future depends on strong families and a strong community. The new playground and gathering area will provide ECN with a state-of-the-art place for kids to swing, jump climb and laugh and sitting areas and shelters for families to gather. Construction is underway so swing by for a look but please keep a safe distance from the site.

PLAYGROUND EQUIPMENT GETS READY FOR KIDS
